BOOK-G RTL

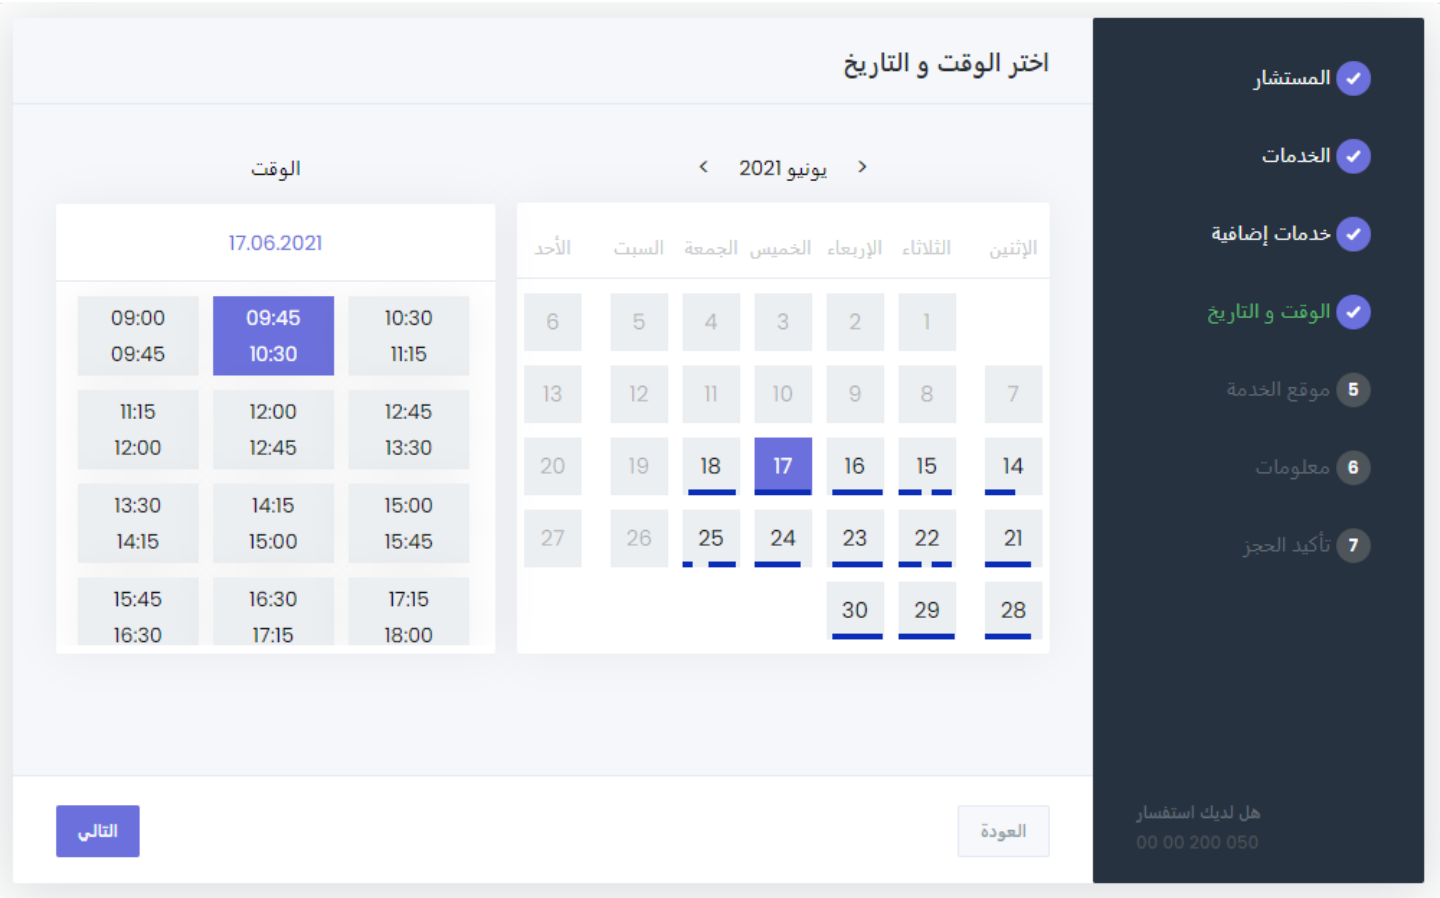

Features · https://book-g.com/docs/book-g-rtl/

BOOK-G Appointment Booking Software with RTL feature.

Some languages (Arabic, Hebrew, etc.) are RTL, which are read right-to-left instead of left-to-right. Typically in web applications supporting one of these languages, everything is reversed, meaning scroll bars, buttons, etc.

BOOK-G also supports RTL languages.

If you are custom to one of the RTL languages, you can conveniently use the BOOK-G Appointment Booking Software with RTL support.

BOOK-G Appointment Booking Software with RTL feature.
